PRODUCTS CATALOG

PT Meditrans Global

DESyne X2

DES Stent

Features:

- Low-Profile Drug-Eluting Stent Design with High Flexibility
- Ultra-thin design with a polymer thickness $<3\mu\text{m}$
- Cobalt Chromium L-605 Material
- Novolimus Drug Delivery

Mitigator

DES Stent

Features:

- DES + DCB, Bio-Compatible CoCr(L605) Alloy
- Hybrid Cell design for higher strength and flexibility
- Biodegradable Drug Polymer completely degrades in 6-7 month
- Unique strut design for flexibility and larger surface area
- Added Extra Connectors at the Proximal and Distal ends to reinforce Axial and Radial Strength

GuReater

DES Stent

Features:

- $75\mu\text{m}$ strut thickness
- 3.4% Low recoil ratio
- PLGA biodegradable polymer
- 90-days drug releasing period
- MRI compatible
- Super flexibility and crossability
- Earlier endothelialization

Consumables

Cardiology

Drug Coating Balloon (DCB)

Everflow

Drug Coating Balloon (DCB)

Features:

- CE Certificate
- Drug Delivery Specific Balloon Catheter
- Special HighBind Uniformly 100% Balloon Surface Coating
- Better drug Adhesion/High Drug Transfer to Vessel.
- Precision Drug Loading

Agent

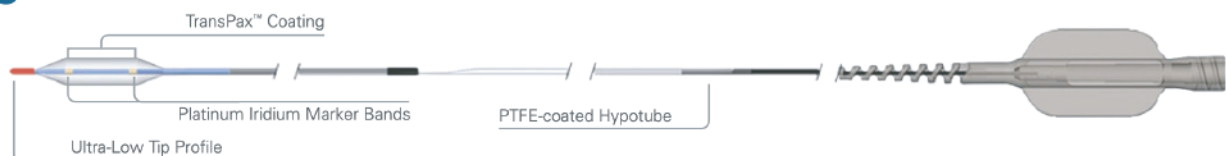

Drug Coating Balloon (DCB)

**Boston
Scientific**
Advancing science for life™

Features:

- Low dose paclitaxel at $2\mu/\text{mm}^2$
- Novel excipient Acetyl Tributyl Citrate (ATBC)
- Z Glide improved tracking with proprietary lubricious coating
- Bi-Segment Inner Shaft and Laser Bonded Tip

Agent™ Paclitaxel-Coated PTCA Balloon Catheter

Gusta II

Balloon Dilatation Catheter

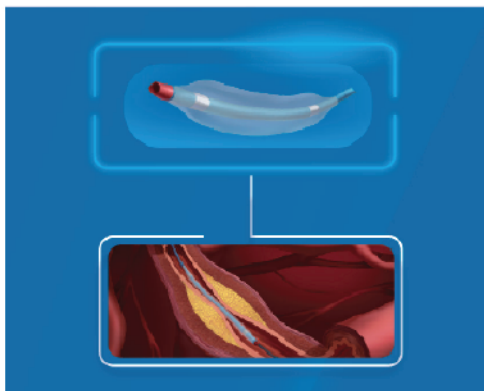

emax

Features:

- Superior deliverability advanced design
- Stable optimized lubricious hydrophilic coating
- The excellent smooth transition between hub and proximal shaft

 **catalogue**
Also Available Here!

- Excellent crossability and good pushability
- Accurate compliance and safe burst pressure ensure ideal dilatation outcome
- A broad range of specifications, allows for refined manipulation when treating complex lesions

Gusta NC II

Balloon Dilatation Catheter

emax

Features:

- 2.00mm length of tapered tip and fully wrapped guidewire design
- Advanced material design

Consumables

Cardiology

Imaging Catheter

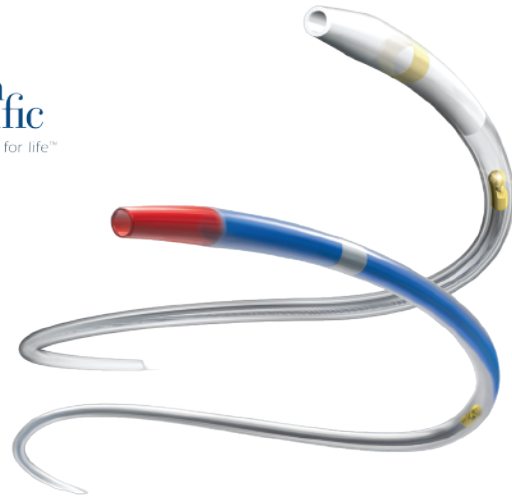

OptiCross & Pullback

Imaging Catheter

**Boston
Scientific**
Advancing science for life™

Features:

- Best-in-Class Image Quality
- Exceptional Deliverability
- Advanced Coating and Balloon-like Technology
- Best-in-Class Image Quality
- Improved Ease of Use

Comet

Imaging Catheter

**Boston
Scientific**
Advancing science for life™

Features:

- Shapeable and atraumatic Asahi tip
- Precision cut body for 1:1 torque
- Optimized rail support for device delivery
- Free-spinning, quick-release handle
- One wire for the entire procedure
- Optical technology for superior drift performance and reliable signal connection

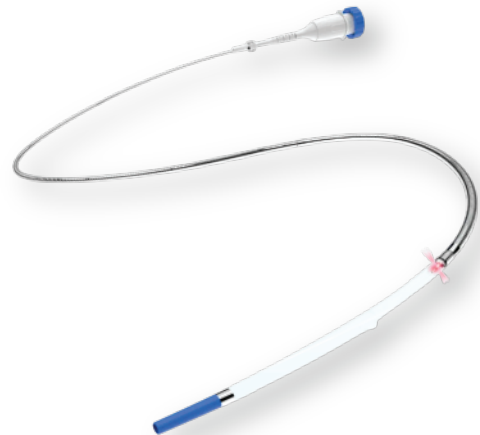

Pathfinder 164

Imaging Catheter

Features:

- Low-profile: 2.58 Fr
- Hydrophobic coating
- Enhanced out-layer of distal catheter
- Short distance from Lens to Tip: 20mm

Manifold

Accessories

MIRAIL Medical

Features:

- Pressure Rating Up to 500psi (34bar)
- Multiple Port Configurations with Rotating Adapter
- Soft Type Options, providing flexibility with different types of tubing or connectors.

Inflation Device

MIRAIL Medical

Features:

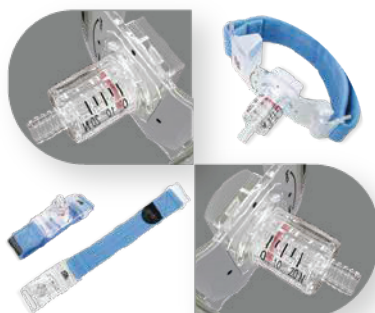

- Medium pressure(500psi) 3 ways stopcock with vented cap.
- 30cm (1200psi) extension tube, Volume: 20ml.

Extension Tube

MIRAIL Medical

Package Contains:

- Customizeable Length
- High Pressure Rating (500 psi/1200 psi)
- No Braided and Braided Options
- F/M Luer Lock & Rotating Adapter Options

Pressure Bandage

MIRAIL Medical

Features:

- Medical Grade Silicone.
- Easy Monitoring of Puncture Site.
- Comfortable band, available various size.

Y - Connector Pack

MIRAIL Medical

Features:

- Large lumen: Max 9Fr(3.0mm) for various device compatibility.
- One-hand operation with 4 types: Rotating, Push-Click, Push-Pull and Push-Rotate.
- Clear polycarbonate body enable good observation of bleeding.
- Pressure injection allowance up to 400psi.

Introducer Set Femoral

MIRAIL Medical

Features:

- Different color and number make easy identity for different French size.
- Atraumatic tip reduce the damage to the artery.
- Cross-cut haemostasis valve minimizing blood reflux and air aspiration.
- 0.035" or 0.038" Stainless steel guidewire, Ni-Ti guidewire available.

Introducer Set Transradial

MIRAIL Medical

Features:

- Longer tapers ensure smooth transition.
- Atraumatic tip reduces damage to the artery.
- Cross-cut haemostasis valve minimizing blood reflux and air aspiration.
- Stainless steel guidewire, hydrophilic guidewire with cannula needle available.

Hydrophilic Guidewire

MIRAIL Medical

Features:

- High quality Niti core wire for better navigation and faster vessel selection
- TPU jacket with tungsten providing excellent visibility under X-ray
- Unique coating technology ensure a lubricant surface durable

Guidewire J - Tip

MIRAIL Medical

Features:

- High quality PTFE pre-coated stainless steel.
- Highly flexible and smoothly rounded wire tip.
- Special designed dispenser to achieve easy flush.
- J tip radius: 3.0 mm or 1.5mm

Angiographic Catheter

MIRAIL Medical

Features:

- Soft tip reduces potential for vessel trauma
- Double braided stainless steel for 1:1 torque control
- Maximum pressure: 1200psi / 84 bar
- Maximum Guide wire: 0.038" / 0.97 mm

Angioset Paket 1

Standard Package

Package Contains:

- Standard Disposable Angiography Sheath, Alignment Trolley, Table Cover, Counter Cover, Upper Image Cover, and Instrument Table Cover

MIRAIL

Angioset Paket 2

Complete Package

Package Contains:

- Standard Package
- Exposure Unit

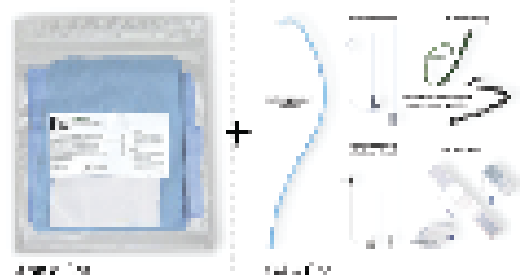

Angioset Paket 3

Standard Package + CACS

Package Contains:

- Standard Package
- CACS set

MIRAIL

MIRAIL

Angioset Paket 4

Complete Package + CACS set

Package Contains:

- Standard Package
- Exposure Unit
- CACS set

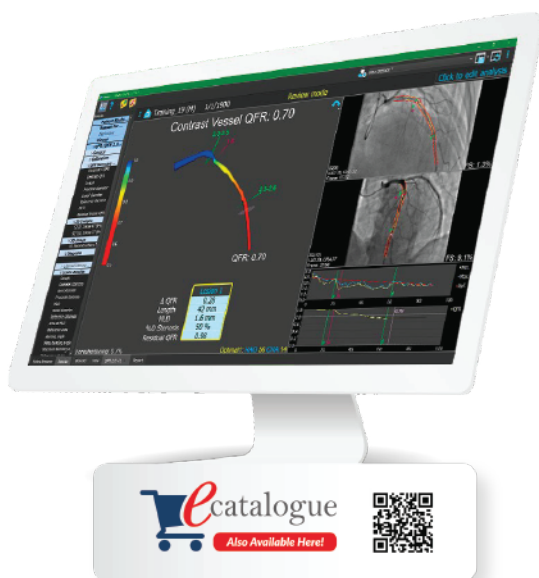

Cornaris P-80E

Intravascular Coronary

Features:

- $\leq 15 \mu\text{m}$ High-resolution Imaging
- Single OCT pullback could obtain multimodal assessment; Index of Plaque Attenuation (IPA), Virtual Flow Ratio (VFR), Intelligent Calcium Assessment (ICA) Rapid Imaging Modes
- Advanced Assessments: Auto-calculation of Neointimal Coverage, Auto Quantitative Bifurcation Assessment to optimize treatment strategies.
- Enhanced Workflow: Angiographic co-registration, 3D View

Q-Angio XA 3D

Intravascular Coronary

Features:

• Clinical Evidence

The angio-based solution supported by the greatest number of peer-reviewed scientific publications

• User Friendly

Simple & intuitive workflow, applicable for in-procedure as well as offline usage.

• Time & Cost Efficiency

No pressure wire, no adenosine. Reduces treatment costs and procedure time.

• Eccentric Lesions

Accurate even in the case of eccentric lesions.

Capital Product

Intravascular Coronary

ROTAPRO

Intravascular Coronary

**Boston
Scientific**
Advancing science for life™

Features:

- Vibrant Digital Display – Enhanced feedback and deceleration indicator
- Ergonomic Dynaglide™ Design – Simple system removal
- Able to navigate calcified lesions with 1:1 torque through tortuous anatomy

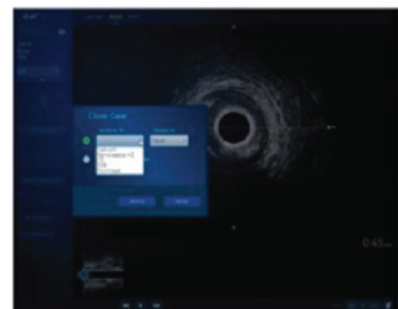

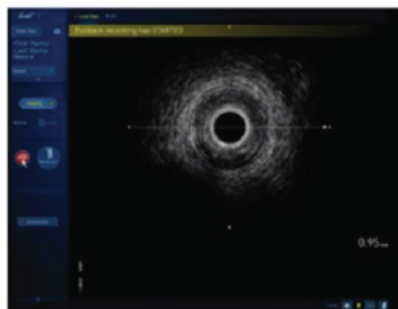

Polaris-IVUS

Intravascular Coronary

**Boston
Scientific**
Advancing science for life™

Features:

- Fully integrated and mobile options fit seamlessly in any facility.
- Reduce capital footprint and integrate into existing hemodynamic system to transmit FFR result directly into patient record. Compatible with all major hemodynamic systems

LabsPro 2D Mapping & Maestro

**Boston
Scientific**
Advancing science for life™

Features:

- Excellent electrogram signal processing and analysis.
- Customizable layout and procedure flow Waveform export in a variety of raw and image formats (ASCII, Binary, JPG, and BMP).
- Enhancements to user interface for improved patient assessment.

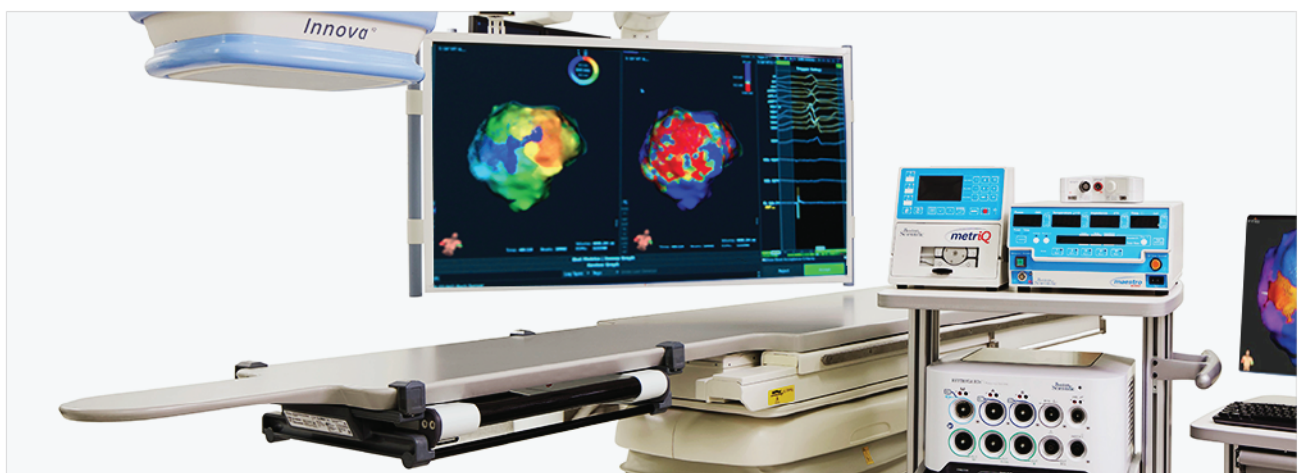

RHYTHMIA HDx

3D Mapping System

**Boston
Scientific**
Advancing science for life™

Features:

- Magnetic Tracking Accuracy and Precision
- Auto-detect all front panel connections excluding the stimulation, blood pressure, and patch connections
- Support automatic identification of Boston Scientific magnetically tracked catheters

Capital Product

Holter Monitoring

SE-2003/SE-2012

Holter Monitoring

Features:

- Lightweight Design (50g), IP27 Protection Grade
- Event Marker M and Extensive Software Analysis

SA-20

Holter Monitoring

Features:

- Extensive ECG and Blood Pressure Analysis Tools
- Overtime and overpressure protection

SE-1010

Holter Monitoring

Features:

- Wired and wireless solutions
- Clear and reliable 12-lead ECG Waveforms acquisition
- Compatible with reputable treadmills & bicycles
- Comprehensive analysis

SE-1200 Express

Electrocardiograph

Features:

- 8" high resolution color touch screen and Alphanumeric
- keyboard
- Extended printing once arrhythmia is detected for further rhythm analysis
- Internal storage up to 800 ECGs
- Data transmission to PC via LAN/internal Wi-Fi

SE-12

Electrocardiograph

Features:

- Customized exercise protocols in addition to Bruce and Modified Bruce
- Support exercise blood pressure monitor
- Anti-noise technology with comprehensive filters and high CMRR >140dB
- Internal storage up to 800 ECGs
- Data transmission via series port/LAN/Wi-Fi
- Optional Data Management System

SE-300

Electrocardiograph

Features:

- 8" high resolution color touch screen and Alphanumeric keyboard
- 12-lead dengan 24-bit A/D Converter
- Extended printing once arrhythmia is detected for further rhythm analysis
- Internal storage up to 800 ECGs
- Data transmission to PC via LAN/Wi-Fi

Capital Product

Stress Test

Stress Test with Treadmill

Stress Test System

Features:

- ECG Software support
18/16/15/12/9-lead Analysis
- Built-in ECG glossary and Electrode Inversion
- Wired/Wireless Sampling Box
- Connect to HIS/EMR/PACs/CIS
- Self-calibrating Runner Treadmill (Stress Test)

Stationary Bike

Stress Test System

Features:

- Compatible with Edan SE-12 Express ECG Machine and most stress test software
- Ergonomic handrails and emergency stop switch

iX Series

Patient Monitor

Features:

- 15" Full HD Touch Screen
- 6 Standard Parameter
- Continuous Noninvasive Blood Pressure (CNBP),
- 15s iFAST Rapid Blood Pressure Measurement

X12

Patient Monitor

Features:

- Ultrathin 12.1" and High Resolution Screen
- 8GB Internal Memory
- Built in WIFI
- Optional CO2, Dual IBP Slots, 6-12 lead ECG
- Arrhythmia and ST Analysis

iM3

Patient Monitor

Features:

- Ultra Slim Design and Weight <2.5kg
- Quick Pass : BP Measurement, New Patient, Type Switch
- 105° Tilted with Customizable Shortcut
- Full options of SpO2, NIBP and Temp Measurement

Capital Product

Intensive Care

HP60

Infusion Pump

Features:

- Touchscreen operation method,
- Free combination & Flexible assembling
- Infusion compensation algorithm
- Needle-off alarm

 **e catalogue**
Also Available Here!

 **e catalogue**
Also Available Here!

HP70

Infusion Pump

Features:

- Touchscreen operation method,
- Free combination & Flexible assembling
- Infusion compensation algorithm
- Needle-off alarm

 **e catalogue**
Also Available Here!

HP80

Infusion Pump

Features:

- Effortless Installation and Removal
- Equipped with high sensitivity infusion scale
- Needle-off alarm

 **e catalogue**
Also Available Here!

Voyager PACS

Cloud Reporting Teleradiology PACS

Features:

- Pre-emptive download for real-time reporting.
- Web viewing via LAN, WAN, and Internet.
- Scalable from small practices to wide systems.
- Compliant with DICOM, JPEG standards.
- Fast access to online images, including streaming.
- Import documents/images, DICOM printing, CD/DVD burning.
- Low-cost entry, high performance and security
- Expandable storage and multi-server options
- Web viewers (high-end and Zero Foot Print)
- Able to use standard and commercially computers, servers, operating systems and network infrastructure with expandable storage capability
- Email referrer when Report/images are available for review

iPad

Voyager RIS

Cloud Reporting Teleradiology RIS

Features:

- Integrated with PACS and HIS for for patients, staff, and radiologists efficiency.
- Reception System
- Reporting and Administration
- Patient Reporting
- Booking System and other Utilities.

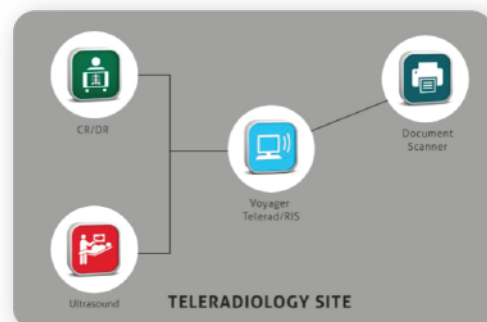

Voyager Telerad

Teleradiology Profesional Tools

Features:

- Customizable interface and toolbars
- Image manipulation and true-size display
- Window & Level (including W/L presets)
- Measurements, annotations, and multiple enhancements
- DICOM printing and export
- Upgradeable to PACS Workstation

Lead Lining

Lead Shielding Services

Features:

- Reduces and neutralizes radiation exposure.
- Effective radiation protection with 2 mm lead thickness.

Lead Glass

High-quality Pb Glass

Features:

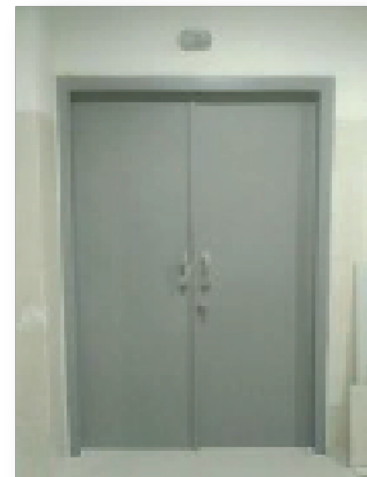

- Protects cameras and electronic equipment from X-ray exposure.
- Specially designed to absorb X-ray radiation while allowing light transmission.

Radiation-Resistant Doors

Features:

- Available finishes: HPL, Stainless Steel, or Galvanized Powder Coating.
- Pb (lead) coated for effective X-ray radiation protection.
- Ideal for radiology rooms, as well as laboratories and isolation rooms.
- Provides robust shielding against X-ray exposure.
