About Us

PT. Meditrans Global (Meditrans) was founded in 2012 in Surabaya, started consumables business and medical equipment services in early days, now Meditrans is growing rapidly into any other Healthcare business.

With the strong background and experience of a founder in Healthcare for more than 25 years, We are growing very solid financially, business, number of employees and area coverage in Indonesia to answer the needs of increasing Healthcare spending of Indonesian peoples and also existence of national insurance (BPJS). Our main business is in the PPP (KSO) model of Cardiology and Radiology services, we provide the turnkey solution to partner hospitals to increase Healthcare access on high technology, and transfer knowledge to support healthcare providers to give the best diagnostic, right and accurate treatment to patients.

We have a strong sales and technical team which currently Meditrans is appointed as main distributor of Cardiology Consumables, Radiology solution, Ventilators and Laboratory providing hospitals with the latest technology.

Table of Content

Cardiovascular Solutions 01-15

Cardiology Consumables	01
Cathlab Accessories & Disposable	05
Intravascular Imaging	09
Interventional Coronary & EP	11
Cardiology Diagnostic & Monitoring	14

Radiology Solutions 16-17

PACS	16
Image Guided Therapy	17
Diagnostic Imaging (MR, CT, Fluoroscopy)	17
Ultrasound	17

Critical Care Solutions 18-20

Patient Monitoring	18
Emergency Solutions	19
Infusion & Syringe Pump	20

Surgical & OR Solutions 21-24

Surgical Instrument	21
Surgical Power Tools	22
Imaging & Digital Microscope	23
OR Equipment	24

Partnership & Project Solutions 25-27

DynamX

Coronary Bioadaptor System

- Novel uncaging elements with bioresorbable polymer coating.
- Low-dose Novolimus elution over 3 months ensures optimal healing.
- 71µm thin cobalt chromium strut for superior flexibility and deliverability.

ELIXIR
MEDICAL CORPORATION

MeRes100™

Sirolimus Eluting BioResorbable Vascular Scaffold System

- World's First 100 µm PLLA Bioresorbable Scaffold (BRS).
- Fully Bioresorbable in 2–3 Years restoring natural vessel structure.
- Couplets of Tri-axial Radiopaque Markers on both ends.
- Low 24% scaffold-to-artery ratio with minimal recoil.

Meril

BioMime Branch

Sirolimus Eluting Coronary Side Branch Stent System

- Ultra-thin 65 µm thickness CoCr stent.
- Dedicated bifurcation design with Flexi Connector to maintain side-branch access.
- Novel Hybrid Design - Anchors main branch while protecting the side branch.

Meril

DESyne X2

Novolimus Eluting Coronary Stent

- Low-profile, ultra-thin DES (<3µm polymer) crafted from Cobalt Chromium L-605.
- Engineered for high flexibility and seamless crossability.

Mitigator

Sirolimus Eluting Coronary Stent System

- DES + DCB CoCr (L605) Alloy with Biodegradable polymer fully degrades in 6-7 months.
- Hybrid cell & unique strut design. enhance flexibility, surface contact.
- Extra proximal & distal connectors improve axial and radial strength.

Metafor™

Sirolimus Eluting Coronary Stent System

- Ultra-thin 65 µm thickness.
- Biodegradable polymer coating for stability and controlled drug release.
- Hybrid stent design for radial strength and side branch access.

GuReater

Co-Cr Sirolimus-Eluting Coronary Stent System

- 75 µm strut thickness with biodegradable polymer enabling 90-day sirolimus drug release.
- Low recoil ratio of 3.4% for precise stent placement.
- MRI compatible.

ASD

VSD

PDA

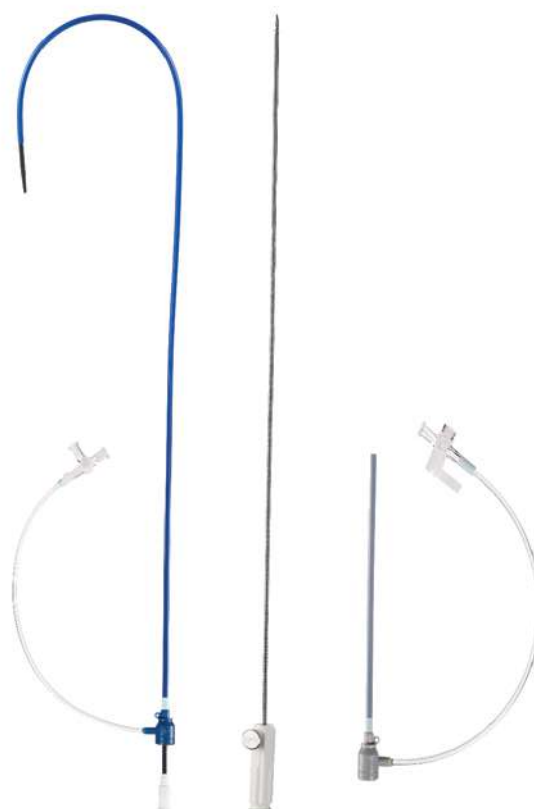

INAPROC
Katalog Elektronik

Occlunox Occluder Series (ASD / VSD / PDA)

- Self-expandable nitinol wire mesh structure
- Specific design: double disc (ASD), muscular VSD, and T-cone (PDA)
- Immediate and secure occlusion
- Precise anatomical fit
- Promotes tissue growth and healing

Occlunox Delivery Sheath

- Available in 45° for ASD and 180° for VSD/PDA
- Smooth and accurate device deployment
- Flexible sheath with hemostatic valve

INAPROC
Katalog Elektronik

Rivarp
MEDICAL

VesPenetrator CTO PTCA Balloon

- Tapered tip for easy CTO penetration
- TranSmooth design for torque-resistant vessels
- Precision controlled balloon compliance and length expansion.

Vesttraveler SC PTCA Balloon Dilatation Catheter

- Unique taper-tip design for easier usage in small vessel
- Low balloon profile and clearer marker band to enhance travelability
- Precision controlled balloon compliance and length expansion

Everflow Drug Coated Balloon (DCB)

- HighBind Coating 100% uniform Paclitaxel coating with controlled release
- Minimal drug loss – Precise delivery during balloon expansion
- Long lasting efficacy – Effective vessel drug retention up to 30 days.

VexPander® NC PTCA Balloon Dilatation Catheter

- Transmooth™ technology enhanced deliverability
- Precision controlled balloon diameter & length expansion
- High pressure & rupture resistant

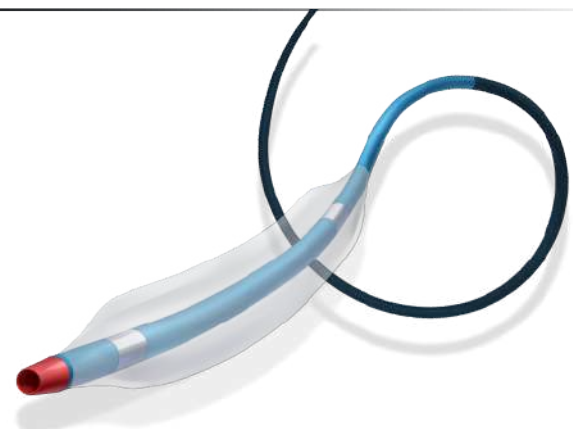

Gusta II PTCA Balloon Dilatation Catheter

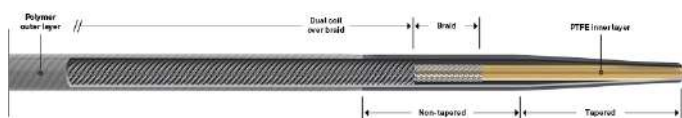

• GUSTA II NC Balloon

Ensures full stent expansion and optimal wall apposition while protecting healthy tissue

• GUSTA II SC Balloon

Provides smooth lesion crossing and precise dilation with tapered tip and hydrophilic coating

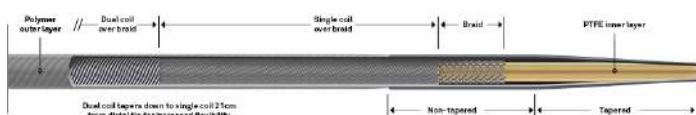

Turnpike

- Excellent trackability through tortuous and calcified vessels.
- Hydrophilic distal coating for smooth advancements.
- Strong torque transmission for reliable navigation in complex anatomy.

Turnpike Spiral

- Outer nylon coil for enhanced rotational advancement
- Improved trackability with clockwise rotation.
- Enhanced rotational support based on Turnpike design.

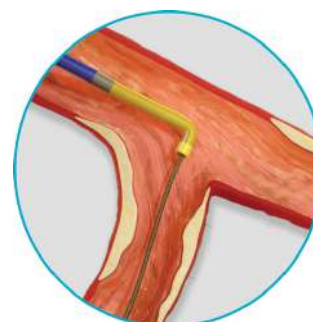

Turnpike LP

- Antegrade & retrograde compatible.
- Low distal profile for small, tortuous vessels.
- High distal flexibility for extreme anatomy.

SuperCross Microcatheter

- Dual-coil design for torque, flexibility, pushability & kink resistance.
- Platinum/tungsten tip coil for enhanced visibility.
- Hydrophilic distal coating for smooth navigation.
- Multiple tip options: Flexible (FT), 45°, 90°, 120°, 90° XT

Guide Extension Catheters

GuideLiner V3 Catheter

- Half-pipe technology minimizes device-to-collar interaction.
- Silicone coating for stronger backup support.
- Strong torque transmission for reliable navigation in complex anatomy..

Long Introducer Sheath

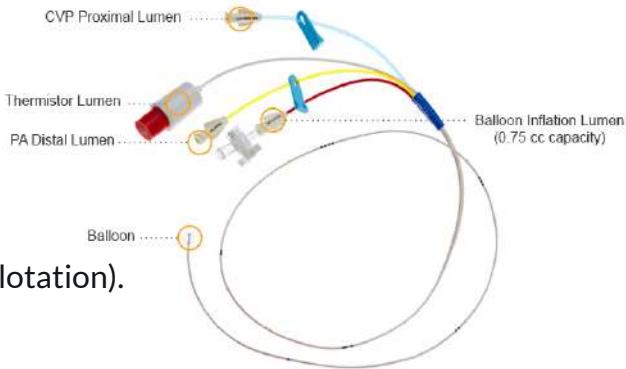

Arrow Percutaneous Sheath Introducer Kits

- Flexible, anti-kinking coil-wire design.
- Radiopaque tip with high sheath visibility.
- Broad Size & Length Options from 4–9 Fr in 7.5 cm and 11 cm lengths.

Thermodilution

Arrow Thermodilution Catheter

- Accurate hemodynamic & cardiac output monitoring for real-time clinical decision support.
- Easy insertion and manoeuvrability.
- Multiple body firmness options (Torque, Flexi Torque, Flotation).
- Three firmness levels, 4–5 lumens.

OCT Imaging System

Cornaris P-80E

3-in-1 Assessment
with 3D Visualization

- Ultra high-resolution imaging (10µm)
- Index Plaque Attenuation (IPA).
- Intelligent Calcium Assessment (ICA)
- VFR (Virtual Flow Ratio)
- Zero-contrast option, co-registration, and 3D visualization.
- Pathfinder 164 Catheter for clear imaging

IVUS (Intravascular Ultrasound)

1st AI-driven 3D IVUS Acopilot

- Broad frequency for High Resolution & Deep Penetration
- Auto-segmentation & Plaque Analysis.
- 3D Visualization, Virtual Stent, Side Branch Detection.
- 2-in-1 Assessment Morphology and Physiology (UFR) with single Pullback.
- Golden-Eye Ultraflyer Catheter: 50 MHz & HD 65 MHz imaging.

**No Pressure Wire
No Adenosine**

QFR XA 3D

- Cost-effective & Non-invasive FFR insights without wires or drugs, saves time and cost.
- AI-Powered Automated vessel selection and analysis accelerate workflows.
- Fast & Fully Integrated - Accurate QFR results delivered within minutes, seamlessly integrated into the cath lab workflow.

Medis Suite MR-CT

- All-in-one Cardiac Analysis, MR & CT visualization and quantification in one platform.
- Advanced 3D Imaging, Precise anatomical and functional insights.
- Smart & Efficient Workflow, Auto contouring and instant reporting.

GE HealthCare

AltiX BT22

INAPROC
Katalog Elektronik

EP Recording

CardioLab

- High-fidelity signals with Advanced digital amplification (Prucka 3) for low noise & clear signals.
- Smart EP analysis tools: Dual real-time display, ML-based cycle length, multi-window review, ClearMatch.
- Seamless & secure clinical data integration.

INAPROC
Katalog Elektronik

Hemodynamic Recording

Mac-Lab

- Efficient workflow & documentation for cath lab productivity.
- Integrated dPR/DFR for accurate coronary assessment.
- Secure, interoperable IT integration.

Hemodynamic and EP

ComboLab

- All-in-one platform combining cath lab and EP capabilities for versatile cardiac procedures.
- Unified UI & workflow for easier training and improve efficiency.
- Simplified IT & cost management reducing setup, network complexity, and equipment purchases.

EP 3D Mapping System

Rhythmia HDx 3D

- Magnetic tracking accuracy and precision
- Auto-detect all front panel connections excluding the simulation, blood pressure, and patch connections
- Support automatic identification of Boston Scientific magnetically tracked catheters

RotaPro

- Vibrant digital display - enhanced feedback and deceleration indicator
- Ergonomic Dynaglide™ Design - Simple system removal
- Ability to navigate through calcified lesions and tortuous anatomy

Rotational Atherectomy System

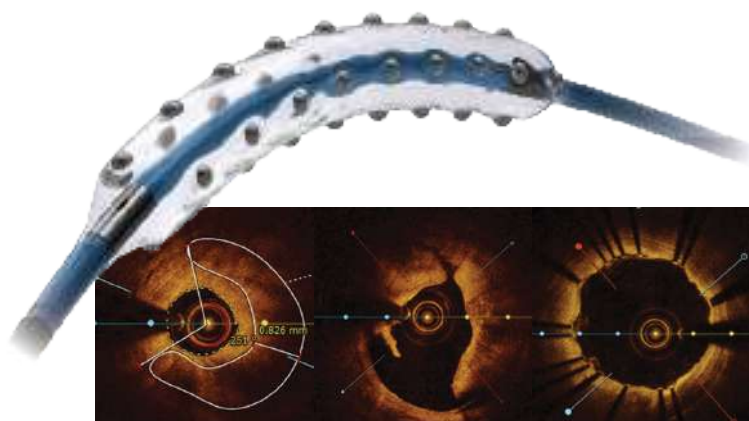

**Boston
Scientific**

Advancing science for life™

ELIXIR
MEDICAL CORPORATION

LithiX Hertz Contact IVL

- Utilizes Hertz Contact Technology to precisely crack deep calcified lesions
- No external generator needed
- Effectively treats concentric, eccentric, and nodular calcifications

Vesscrack Coronary IVL System

- Portable, rechargeable, controlled through the handle
- Quick & automatic setup according to the catheter size
- Release up to 80 pulses per cycle
- Shockwave energy could target lesions in all directions

IVL Intravascular Lithotripsy System

Thorcrack Peripheral IVL System

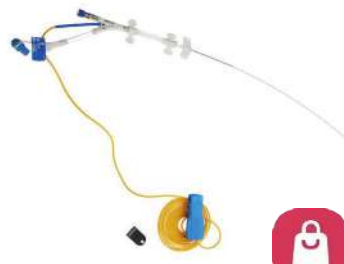

- Semi-compliant balloon with great flexibility & traceability
- Uniform energy for effective calcification disruption
- Portable, rechargeable, handle-controlled system
- Tapered tip with multiple size options for different lesions

Teleflex®

INAPROC

Balloon Pump

UltraFlex IABP Catheter

Multiple balloon sizes (30/40/50 cc) with 7.5F / 8F design.

Ultra 8 FiberOptix IAB Catheter

High-fidelity pressure signal for precise IABP timing.

Meril

Myosist 8F IAB Catheter

- Enhanced hemodynamic support & diastolic augmentation.
- 0.028 inch inner lumen diameter with durable balloon.

ACIST®
A Bracco Company

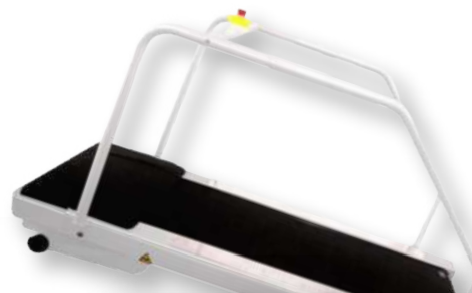

Contrast Delivery System Acist CVi Injector

- Reduces contrast usage by up to 20% while maintaining imaging quality
- Simplifying workflow and efficiency to reduce up to 31% procedure and setup time
- Compatible for all interventional and diagnostic cardiology procedures

**BPlab®**

24-hour Blood Pressure Monitors

- Lightweight, portable, and available in multiple cuff sizes
- Quick artefact detection for reliable readings and integrated with analysis software

SE-2003, SE-2012, SA-20, and SE-1010

Complete Your Monitoring Solutions with Edan!

From ECG to Holter, stress test system, and echocardiography, Edan offers a full range of diagnostic cardiology solutions.

Voyager PACS

Picture Archiving & Communication System

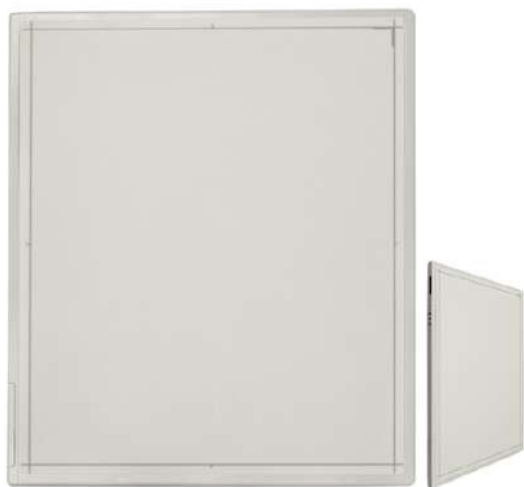

- **Australian-made** with 38+ years of proven reliability worldwide.
- **Seamless HL7 integration** with hospital system (SIM-RS).
- **Fast online access** – streaming, web viewing, and DICOM/JPEG support.
- **Scalable & secure** – from clinics to large hospitals, expandable storage, multi-server support.
- **Voyager RIS Integration:** streamlines patient, staff, and radiologist workflow with reception, admin, reporting, and booking utilities.

Digital Radiography

Cassette-Size Flat Panel Detector

- **Instant image display** within 5s - Preview
- **Up to 300 exposures** in 3 hours
- **i-Sync 2 Technology** 60% higher sensitivity for sharper imaging.
- **Dual Band WiFi Supports** 2.4G and 5G connectivity.
- **Built-in storage** for up to 200 images.
- **Smart Auto-Detach** – Wireless and wired operation with online charging support.

SHARING EXPERTISE

Standard Pump Series

Compact^{plus}

- **Infusomat Pump:** Volumetric pump, semi-automatic drive, fast-recharge battery.
- **Perfusor Pump:** Syringe pump, intuitive operation, long-lasting battery.
- **Compact Plus Station:** Holds up to 18 pumps, guided insertion, single power source

Advance Pump Series

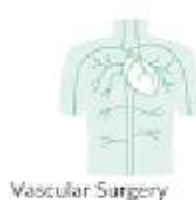

Space^{®plus}

- **Spaceplus Perfusor:** Syringe pump, robust freeflow protection, touchscreen, full connectivity.
- **Spaceplus Infusomat:** Infusion pump with $\pm 3\%$ accuracy, dual freeflow protection.
- **SpacePlus Station:** Modular station for up to 24 pumps, centralized alarms.

Surgical Instrument

Aesculap Surgical Set

- Manufactured in Germany with world-class quality and accuracy.
- Offers over 19,000 instruments for various surgical specialties.
- Fully compatible with Aesculap container and sterilization systems.

Sterile Container System

AESCLAP Aicon®

- Optimized Sterilization Workflow & Performance.
- Ergonomic and User-Focused Design.
- High Versatility Across Surgical Applications.

Electrosurgical Unit

Non-Stick Bipolar with Generator GN160

- Impedance-controlled output minimizes tissue sticking and carbonization.
- Stable energy delivery for accurate bipolar coagulation.
- Simple power control, single footswitch, compatible with Aesculap bipolar forceps.

Battery Operated Power System

AESCULAP Acculan 4

- Powerful, Longevity – Exclusion of battery and control electronics from sterilization.
- Titanium housing allows mechanical alkaline reprocessing.
- Golden marked operating elements.

Electric Power System

AESCULAP ELAN4

- Next-generation electric drill for micro bone surgery (neuro, spine, CMF, ENT).
- Smooth, high-performance cutting with direct motor-to-burr drive.
- Low heat and noise with an all-electric, coupling-free design.

Bipolar Sealer & Cutter

AESCULAP Caiman

- One-step bipolar seal & cut, seals vessels up to 7 mm.
- Uniform compression with tip-first closure for consistent sealing.
- 80° articulating jaw, 360° rotation, and seal length up to 26.5 mm.

“Advance Your Operating Environment with VG Medical”

From precision lighting to reliable operating tables and ergonomic dental chairs—brings efficiency, comfort, and control to every procedure, enabling teams to perform with confidence and excellence.”

PPP (Public Private Partnership)

PPP is partnership between Public Hospital and Private Company is one of the solutions by private companies to help and collaborate with hospitals to open new services and get access to new technology and transfer knowledge.

Why PPP ?

Very Experienced in KSO

We are experienced in building KSO Cathlab for more than 20 sites

Steria MOT

Bring Your Modern Operating Theater to Life

- **Expert Design Team,**

Handles end-to-end process from design, production & testing

- **Comprehensive Project Planning**

Site visit, 3D design, stakeholder kickoff, technical approvals

- **Seamless Installation**

Expert technicians manage delivery, MEP tracking, installation, and final testing Turnkey Solutions: From concept to commissioning, ensuring efficient, safe, and high-quality OR Room setup

All items are in-house manufactured, fully customizable—from size, layout, to integration.

Integration Equipment:

X-Ray Viewer

Operating Timer

Passbox with ultraviolet light, interlocking

UPS Back up Control Panel

Medical Cabinet

Operating Lamp

Structure Accessories:
